

Swivel Barb Adapters

To Prevent Twisting with Soft-walled Tubing Connections

The new Upchurch Scientific® Swivel Barb Adapters from IDEX Health & Science are made up of two captive pieces acting as a one-piece fitting for ease of use. Manufactured from Polypropylene and available in three barb sizes, the Swivel Barb Adapter will facilitate connection between flexible tubing to 1/4-28 flat-bottom ports. The barbed insert spins freely from the threaded nut in order to prevent the tubing from twisting during installation.

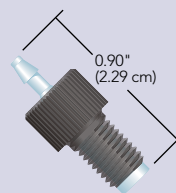

Key Features

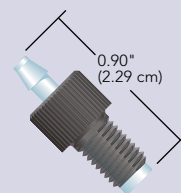

- ▶ Barb connection spins freely from the nut to prevent twist during installation
- ▶ Compatible with standard 1/4-28 flat-bottom receiving ports
- ▶ Three versions available to connect soft-walled tubing with the following inner diameters: 1/16" (~1.6 mm), 3/32" (~2.4 mm), 1/8" (~3.2 mm)

Technical Specifications

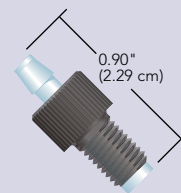

- ▶ Threaded nut and barbed insert manufactured from Polypropylene (PP)
- ▶ Maximum recommended continuous operating temperature is 40 °C
- ▶ Barbed insert specially designed with no parting line on the barbed tip to ensure more reliable sealing

D-646
1/4-28 to 1/16" ID tubing

D-647
1/4-28 to 3/32" ID tubing

D-648
1/4-28 to 1/8" ID tubing
